SELECTED REFERENCES ON THERMOLUMINESCENT DOSEMETERS
FOR PERSONNEL MONITORING

A bibliography 1974-1976

Compiled by Helen Lawson

August 1976

This bibliography contains references on: specific thermoluminescent dose-meters used for personnel dosimetry; comparisons of thermoluminescent and other doseimeters for personnel monitoring and read-out apparatus for thermoluminescent doseimeters.

An appendix contains selected foreign language references.

HOW TO USE THIS BIBLIOGRAPHY

The AAFEC Bibliography Series is arranged in chronological order, starting with the most current material and ending with the oldest material. Within this order, entries are alphabetical under the author's name or corporate body. If neither the author nor corporate body are given, the item is entered under title and placed at the beginning of the material collected for the year of the item's publication.

The majority of reports cited in INIS and NSA are available through the Library. Location of journal articles can be made by consulting Scientific Serials in Australian Libraries (SSAL).
