Fission Products Library

Revision 2

Summary Documentation

Abstract

This document summarizes contents and documentation of the 1984 version of the Fission Products Nuclear Data File of the ENDF/B-5 Library (Rev. 2) maintained by the National Nuclear Data Center (NNDC) at the Brookhaven National Laboratory, USA. This file contains numerical neutron reaction data and decay data for 877 fission product nuclides. The entire file or selective retrievals from it can be obtained on magnetic tape from the IAEA Nuclear Data Section.

IAEA NUCLEAR DATA SECTION, P.O. BOX 100, A-1400 VIENNA

ENDF/B-5

Fission Products Library

Revision 2

Contents of present document:

- I. Introduction
- II. Index of the 28 fission product evaluations from ENDF/B-5 General Purpose File, ("EN5-FP1")
- III. Index of the 877 materials ("EN5.2-FP2")

I. INTRODUCTION

The fission products part of the ENDF/B-5 Library includes neutron reaction data (cross sections and various differential data) and decay data for 877 nuclides. The data available from the IAEA Nuclear Data Section are given in 2 separate files:

- 1) 28 fission product nuclides from the ENDF/B-5 General Purpose File. These are complete evaluations of all relevant neutron-induced reactions plus some decay data. This file will be abbreviated in this document by 'EN5-FP1'.
- 2) the ENDF/B-5 Fission Product File consisting of 877 nuclides (metastable states are counted as different nuclides). For these, some neutron reaction data (but no complete evaluations) and/or decay data are given. Of this file, four materials containing decay data only, were revised; the revisions were distributed in March 1984. These revised materials are MAT 9279 (42-Mo-93g), 9607 (53-I-128g), 9869 (66-Dy-165g), 9870 (66-Dy-165m). This file, updated by these four materials, is referred to in this document as 'EN5.2-FP2'.

The differences between the two files 'EN5-FP1' and 'EN5.2-FP2' are summarized on the table on the following page. Note, that the 28 nuclides, of 'EN5-FP1' are also included in 'EN5.2-FP2', but with different data-types.

For 13 isotopes of Zr, Ba, Gd, Dy no data are available in either of the two files.

Available: Both parts of the ENDF/B-5 Fission Products Library are available

- in the original form containing resonance-parameters where applicable;
- in "RECENT output" form, where NDS converted resonance-parameters to cross-section data;
- in "edited" form convenient for reading of listings but not suitable for computer processing.

ENDF/B-5 (Rev. 2) Fission Product Data  
Main features of the 2 sub-files EN5-FP1 and EN5-FP2

	EN5-FP1	EN5.2-FP2
Official Name of File	General Purpose Fission Product Data (from ENDF/B-V General Purpose File)	ENDF/B-V Fission Product File
Date of distribution	April 1979	Original version July 1980, Rev. 2 March 1984
No. of materials	28	877 MAT numbers, for 34 of them no data are given
Contents	Complete evaluations of all relevant n-induced reactions. For 6 materials, also decay data are given	Some cross sections (& differential data) and/or decay data
MAT. NO.s	4 digits, starting with <u>1</u>	4 digits, starting with <u>9</u>
Common materials:	All 28 materials from EN5-FP1 occur also in EN5.2-FP2, but with <u>different</u> (and uncorrelated) MAT numbers	
Materials common to General Purpose File: Contents		No cross sections. For 21 materials given in EN5-FP1, <u>only</u> a reference to EN5-FP1 is given. For the 6 materials having decay data in EN5-FP1 plus one additional material decay data are given. *)
Total no. of records	31486	105 140
ENDF tape nos.	509, 510	541-546 (July 1980) 566 (March 1984 modifications)
Documentation	ENDF-201, 3rd ed. (July 1979). Extensive documentation at the beginning of each material.	Short documentation at the beginning of each material

\*) To further 13 materials, not included in EN5-FP1, only a reference to EN5-GP (unavailable to NDS) is given. (Zr, Ba, Gd, Dy isotopes)

ENDF/B format

A complete description of the ENDF/B format, including all physical definitions required for the processing of more complicated data types (e.g. differential data) is given in the report BNL-NCS-50496 (ENDF-102)

- 2nd edition (Oct. 1975) for ENDF/B-4
- 3rd edition (1980) for ENDF/B-5.

For quick reference of the ENDF/B format (File Numbers and Reaction Type Numbers of the most important data types) see the document IAEA-NDS-10.

Note: Listings of all ENDF/B format data can also be requested in "edited format". Such listings provide all necessary quantity headings, units, etc. and are self-explanatory.

II. Description of the 28 fission product evaluations from ENDF/B-5  
General Purpose File (EN5-FP1)

extracted from the report

BNL-NCS-17541 (ENDF-201), 'ENDF/B Summary Documentation', 3rd edition, July 1979, compiled by R. Kinsey.

III. Index of the 877 materials included in the file EN5.2-FP2

Key to lab codes (see page 4).

The "DATE" given in col. 5 is the date of evaluation or last revision as extracted from the file by computer. (Note that the date of the last revision was apparently not updated in some cases; compare last column).

Only data for materials with MAT=9279 (42-Mo-93g), 9607 (53-I-128g), 9869 (99-Dy-165g), 9870 (66-Dy-165m) and containing decay data were revised.
