CONCERNING THE TOPIC WHAT CONSUMERS THINK ABOUT FOOD IRRADIATION?

SZABO, A. S., TOLNAY, P.
University of Horticulture and Food Industry, Department of Food Chemistry and Nutrition, Somloı str. 14-16,
Budapest, H 1118 Hungary

In the lecture detailed information is given about the evaluation of data of the questionnaire. Data are based on
2000 questionnaires distributed and collected in 1997 and 1998. Evaluation is carried out taking into account the
following parameters: age, sex, education level, living place and financial income.
As a conclusion we can establish that people have a rather limited information about food irradiation.
