Proposal for presenting a paper on Advanced Reactor Program  
Given below is the abstract for Track 6 session on Advanced Reactor at  
the ninth International Conference on Nuclear Engineering being held in  
Nice, France from April 8th through 12th 2001.

Title: Comparison of Advanced Reactors Program of Different  
International Vendors.

Abstract:

This paper will provide an update on Advanced Reactor Program of different vendors in the United States, Japan, and Europe. Specifically the paper will look at the history of different Advanced Reactor Programs, international experience, aspect of economy due to standardization, and the highlights of technical specifications. The paper will also review aspects of Economy due to standardization, public acceptance, required construction time, and the experience of different vendors.

The objective of the presentation is to underscore the highlights of the Reactor Program of different vendors in order to keep the attendees of the conference up-to-date. The presentation will be an impartial overview from an outsider's (not part of the Nuclear Steam Supply System's staff).
