

International Symposium
On
**CONVECTIVE HEAT AND MASS TRANSFER
IN
SUSTAINABLE ENERGY**

CONV-09

April 26 –May 1, 2009, Hammamet, Tunisia

BOOK of SHORT PAPERS

Volume 1

Preface

This book contains the short papers from the International Symposium on Convective Heat and Mass Transfer in Sustainable Energy (CONV-09), organized on behalf of the International Centre for Heat and Mass Transfer and held on April 26 – May 1st, 2009, in Hammamet, Tunisia.

The objective of this conference is to bring together researchers in a forum to exchange innovative ideas, methods and results, and visions of the future related to the general theme of convective heat and mass transfer.

This meeting is firstly focus on a presentation and discussion of theory, experiments, and applications of convective heat and mass transfer in single phase and two-phase flows. An emphasis is placed on the significant recent advances in convective heat transfer in systems for conversion and/or storage of Solar Energy. The importance of such systems is continuously increasing to a point where their dimensioning and design become dominant factors for energy sustainability. While researchers work overtime to create new technologies and methods of providing energy, it is critical that modern industry and environmental strategies make the most efficient use of energy that is currently available. Furthermore, design of buildings with low consumption energy and heat exchangers for air conditioning is becoming a great challenge for reducing pollution and emission of gases with greenhouse effects. Indeed, because of the obscuration and global warming, scientists predict an increase of about 6 degrees of the global temperature in 2100 if human and industrial activities will continue as they have been done in last decades.

Keynote lectures and papers are covering a wide range of topics related to classical and emerging areas of convective heat and mass transfer applications, including:

- Enhancement of heat exchangers
- Jets and Forced Convection
- Natural and Mixed convections
- Thermo-solutal convection, Mass transfer and pollutant dispersion
- Conversion and Storage of solar energy, Geothermal energy
- Fluid mechanics, Turbulence and wind power
- Phase change, Boiling, condensation, two-phase flows
- Production of Hydrogen and Cooling of fuel cells
- Heat transfer and fluid mechanics in greenhouse and building

I would like to acknowledge the tremendous assistance provided throughout more than two years of planning and preparation by the vice-chairman, Professor Rejeb Ben Maad. I am very grateful to the honorary chairmen Professor Sadik Kakaç and Professor Jacques Padet. The valuable cooperation and assistance of all of them were very helpful for the organization of the meeting.

My special gratitude goes to the General Secretary of ICHMT, Professor Faruk Arinç, and all the staff of ICHMT for their guidance and help. I would give a special thank to Aziz Koyuncuoglu for all his efforts in the realisation of the website and the CD-proceeding of the conference. I am so grateful to the members of the Organizing Committee in both Reims and Tunisia, especially to N. El Wakil, C. Maalouf, M. Hammani and M. Bouterra for their assistance in the preparation of this book.

I am very grateful to the International Scientific Committee, as well as the session chairmen. Great thanks go to the keynote lecturers: H. Muller-Steinhagen, M. El Genk, S. Kakaç, C. Ménézo, R. Cotta, W. Worek, L. Vasiliev, L. Guo and M. Van Genuchten.

I would acknowledge the valuable help of the supporting and sponsoring institutions. Finally my heartfelt thanks to all the authors, who provide the substance to the meeting, and to participants for their attendance and contribution.

Mourad Rebay

Table of Contents

Keynote papers

K1	Sustainable Electricity and Water for Europe, Middle East and North Africa <i>Hans Müller-Steinhagen* and Franz Trieb</i>	3
K2	Advances and Methods of Electronics Cooling <i>Mohamed El Genk*</i>	4
K3	Analysis of Two-Phase Flow Dynamic Instabilities in Vertical and Horizontal In-Tube Boiling Systems <i>Sadik Kakaç*</i>	5
K4	Convective heat transfer enhancement for Building Integrated Photovoltaic applications and new solar PV-T collector design <i>Christophe Ménézo*</i>	6
K5	Heat Transfer Enhancement in Laminar Forced Convection: Nanofluids, Microchannels, Structured Surfaces <i>Renato M. Cotta*, Carlos A. A. Mota, Carolina P. Naveira-Cotta, Helcio R.B. Orlande, Jeziel S. Nunes, Mila R. Avelino, Fernando V. Castellões, and João N.N. Quaresma</i>	8
K6	Heat Pipes – Good Tool for Fuel Cells Thermal Management <i>L. L. Vasiliev, O. S. Filatova, L.L. Vasiliev Jr.</i>	12
K7	Study of Thermal Management in PEM Fuel Cells with Numerical Modeling and in-situ Diagnosis Approaches <i>Liejun Guo*, Guangsheng Zhang, Chengjie Xu, Lizhong Ma, Shuanglin Shen, Hongtan Liu, Ying Yang, and Hong Sun</i>	13
K8	Modeling Nonequilibrium Contaminant Transport Processes in Soils and Groundwater <i>Martinius Th. Van Genuchten*, Elizabeth M. Pontedeiro, and Renato M. Cotta</i>	18

155	Analysis of Heat Removal From Shutdown RbmK-1500 Reactor Using Non-Regular Means.....	490
	A. Kaliatka, E. Uspuras, G. Krivoshein	
163	Numerical Modelling and Parametric Studies of Steam Reformers.....	494
	C. Ventura, J. L. T. Azevedo	
178	Thermovisual Investigation of Dryout Process in Annular Flow	498
	D. Mikielewicz, J. Wajs, M. Glinski, J. Mikielewicz	
216	Performance Characteristics of Cooler Controlled Capacity Using Hot-Gas Bypass	502
	J.-H. Choi, S.-M. Baek, B.J. Jin, W.J. Choi, C.G. Moon, H.S. Lee, J.I. Yoon	
217	Thermal Losses Effect on the Performance of an Intermittent Solar Refrigeration Cycle for Generation Phase ...	506
	Y. Boukhchana, A. Fellah, A. Ben Brahim	
220	Combustion Modelling in a Biomass-Fed Furnace.....	509
	C. V. Lossa, D. Lentini, F. Rispoli, P. Venturini	
237	Power Production Limits in Static and Dynamical Systems	513
	S. Sieniutycz	

238	Minimum of Exergy Consumption in Horizontal Fluidized Heat Exchanger.....	517
	A. Poswiata, Z. Szwast	
255	Development of a Non-Intrusive Diagnosis Technique for Gas Lifted Oil Wells.....	521
	T. Abidi, M. S. Guellouz, M. Harbaoui; M. Ellejmi	

Recent Work Posters

154	A Numerical Study of Flow Parallel To Tube Bundles Using Different Rans Models.....	525
	A. Merzoug, F. Billard, A. Sabeur-Bendehina, Y. Addad	
225	Simulation of the Thermohydraulics Parameters in Vaporizer Tubes by Kandlikar Model	528
	A. Benretem, D. Khalfa, I. Meghlaoui, N. Zirari	
249	Numerical Investigation on Natural Convection in Convergentvertical Channels With Porous Media	532
	B. Buonomo, O. Manca, S. Nardini	
257	Experimental Study of a Solar Plan Distiller	536
	M. Abdelkarim, B. Bounegta	
258	Sudy of Energy Balance for a Horicultural Greenhouse With the Use of SIMULINK	537
	B. Bounegta, M. Abdelkarim
