Over fifty years ago states started to introduce legislation protecting the public against the potential magnitude and peculiarity of risks arising from the nuclear energy production. They did so through a specific liability and compensation regime. Whether legislation was based on national initiatives or, as more frequently, related to international nuclear liability conventions, it was based on a number of principles being applied universally. Furthermore, it at the same time strived for not preventing the development of the nuclear industry because of an unbearable liability.

This paper aims at explaining the broad outline of the above legislation, its development since its early years, the state of the art as regards its modernisation as well as the (alleged) problems underlying the delay in its introduction in a number of countries. When dealing with those problems it will be inevitable to touch upon a number of insurance related matters, which, as an insurer I am happy to tell, will lead me to familiar territory.

Keywords: nuclear energy production, liability and compensation regime, international nuclear liability conventions, insurance

Session 1

Energy Planning and Nuclear Option (EPNO)

| | | |
|-------|--|----|
| S1-12 | L. LITVINSKY, O. PURTOV, V. BRONNIKOV, N. VLASENKO, S. SILCHENKO Concept of State Target Economic Program for Nuclear Energy Development up to 2020 | 23 |
| S1-40 | N. ČAVLINA, D. RAŠETA, J. LEBEGNER Prediction of Levelized Costs of New Nuclear, Gas and Coal Power Plants | 25 |
| S1-41 | J. BAURSKI Nuclear Co-Generating Plants for Powering and Heating to Cleaning the Warsaw's Environment | 26 |
| S1-69 | Ž. TOMŠIĆ, R. PAŠIČKO CO₂, Coal, and Gas Price Impacts on Nuclear Power Plant Competitiveness in Croatia | 27 |
| S1-80 | V. KNAPP, D. PEVEC, M. MATIJEVIĆ On the Potential of Nuclear Fission Energy for Effective Reduction of Carbon Emission under the Constraint of Uranium Resources Use without Spent Fuel Reprocessing | 28 |
| S1-90 | I. ANDROČEC, A. ČURKOVIĆ, T. TARNIK Power Generation Strategy Development in Croatia | 29 |
| S1-99 | I. JAKIĆ, J. LEBEGNER, N. PEROVIĆ Programme of Preparatory Activities on Launching First Nuclear Power Plant in Croatia | 31 |
