ABSTRACT

This is a list of titles of journals, yearbooks, directories and other serial publications held in the AECL Main Library which operates as the Canadian national repository for nuclear literature. The listing is alphabetical and indicates the volumes and parts of volumes held in the library. Three appendices identify abstract sources, reference sources and translated periodicals.

Résumé

Le présent répertoire donne la liste alphabétique des périodiques (revues, annuaires, etc.) conservés dans la Bibliothèque principale de l'EACL qui tient lieu de Dépôt national pour toute la documentation nucléaire. Les volumes et les numéros détenus sont indiqués. Trois annexes donnent: les sources des résumés, les sources des références et les périodiques traduits.

INTRODUCTION

Atomic Energy of Canada Limited maintains a substantial technical library at each of its Sites – Chalk River Nuclear Laboratories (CRNL), Whiteshell Nuclear Research Establishment, Power Projects and Commercial Products. The principal one is the Main Library of Atomic Energy of Canada Limited which is in the Technical Information Branch of CRNL, and it serves as the national repository of the literature of nuclear science and technology.

This list supersedes and replaces Report No. Tech Inf-2, rev. 1 “Serial Holdings in the CRNL Main Library”. It is a guide to the serials collection and is intended to provide a serials-holding referral source for other AECL libraries. It is also hoped that the list will prove of value to other libraries in Canada and elsewhere.

Journals whose subject content substantially reflects company research interests and which are indexed in any abstracting source are bound and held indefinitely. Other journals are retained unbound for the period indicated.

Serials are listed, as they are shelved, in alphabetical order by title, with the following exceptions:

Government Publications:

Listed by country of origin, e.g.

Canada, Dept. of Labour. Wage rates, salaries and hours of labour.

Institutions and Societies:

Publications without a distinctive title are filed under the official name of the Institution, e.g.

American Chemical Society. Journal.

not

(Journal of the American Chemical Society)

However, if a journal has a distinctive title, e.g. Journal of Heat Transfer, it is filed under the title.

Incomplete holdings are identified by enclosing the appropriate volumes within oblique (/) signs, e.g.

CORROSION

3, 1947 /4-5, 1948-49/ 8, 1952 –

This indicates that volumes 4 and 5 are incomplete, volumes 6 and 7 are not available, and the holdings are complete from volume 8, 1952 to the present.

The following symbols are used after the holdings statement to indicate that the title is no longer being received.

// Journal has ceased publication.

/// Subscription has been cancelled.

REFERENCE SOURCES

To facilitate literature searches by the CRNL staff, the reference and abstract journals and the cover to cover translations of foreign language journals have been listed in separate appendices, as well as being included in the main list.

Appendix I – Abstract and Index Sources

These are grouped in two sections on the Main Floor of the Library, i.e. Fundamental and Applied Sciences, and Life Sciences collections. The four most frequently used abstracts are located in the Main Floor Extension –

Nuclear Science Abstracts
Chemical Abstracts

Engineering Index
Biological Abstracts

Microfilm versions of these abstracts are provided in 16 mm cassettes and hard copy can be reproduced on the reader-printer located near the cassette storage carousels in the Main Floor Extension.

Appendix II – Reference Sources

These are located on the Main Floor of the Library in the Reference Section.

Appendix III – English Translations of Foreign-Language Journals

Also located in the Main Floor Extension are the cover-to-cover translations in English of foreign-language journals and the corresponding original texts (usually in Russian).

SUBJECT LISTS

Subject listings are published in ten broad subject categories:

0. ADMINISTRATION, MANAGEMENT, LIBRARY SCIENCE, STATISTICS, etc.
1. GENERAL SCIENCE (includes Photography)
2. NUCLEAR SCIENCE
3. LIFE SCIENCES (MEDICINE, BIOCHEMISTRY, BIOPHYSICS)
4. CHEMISTRY AND CHEMICAL ENGINEERING
5. METALLURGY (includes Geology, Earth Sciences)
6. PHYSICS (includes Meteorology, Geophysics)
7. ELECTRONICS AND INFORMATION RETRIEVAL
8. MATHEMATICS AND COMPUTERS
9. ENGINEERING

Subject lists may be obtained from the Main Library. Please quote the appropriate subject categories by number when requesting retention copies.

The compilers wish to acknowledge the assistance of Mrs. Evelyn Smith and Miss Joan Stewart in preparing this material for publication.
